

# Mr Muhammad Moaiz

BSc in Software Engineering

## Profile:

Experienced React Native Developer skilled in creating cross-platform mobile apps using React Native, Expo, REST APIs, and Firebase. Focused on building user-friendly apps with smooth performance and reliable backend integration

**Key Skills:** HTML, CSS, JavaScript, React JS (basics required for react native), React Native Development, EXPO CLI & react native CLI, React navigation, React native Reanimated, REST APIs Integration, Firebase, Teamwork and collaboration, Team management, Leadership, Collaboration, Problem-solving, Niche Platform Applications

## Qualifications:

2024-continue	BSc in Software Engineering	Minhaj university Lahore (MUL)
2022-2024	Intermediate in Compter science	Aims group of Colleges, shorkot cantt

## Experience:

Nov 2024 - Jan 2025:    **internee**    **Developers Hub Cooperation**

- Collaborated with a team to develop cross-platform mobile applications.
- Gained hands-on experience with React Native, Firebase, and third-party libraries.
- Enhanced app functionality and performance through optimized code and UI improvements.

## Projects:

- **Food Delivery App**
  - Built a cross-platform React Native app with Firebase Authentication
  - Integrated third-party libraries for enhanced app performance.
  - Optimized navigation and added animations for an intuitive user experience.
- **Personal Finance Tracker**
  - Developed a finance management app enabling transaction tracking and categorization.
  - Implemented Firebase for secure user authentication and real-time data storage.
  - Visualized data with charts for better user insights.
- **Wallpaper App**
  - Created a React Native app to browse and download high-quality wallpapers.
  - Integrated API for fetching wallpapers and added search/filter functionality.
  - Designed a responsive UI for seamless performance across devices.
- **Weather Forecasting App**
  - Built a weather app with real-time updates and a 7-day forecast.
  - Integrated API for global city search and weather data display.
  - Enhanced user experience with smooth animations and responsive UI.
